

MS01802 EPIDEMIOLOGIST

Level 8

Reports to (Hierarchical)

Medical Coordinator (if Mission scope)/ Project Coordinator

Reports to (Functional)

Medical Coordinator / Activity Manager / Medical Project Referent

Job Family

Medical and Paramedical

Main Purpose

Assessing, implementing and maintaining the epidemiological surveillance systems/monitoring (if needed) according to **MSF** protocols, standards and procedures in order to contribute to appropriate evidence-based decision making using well managed health data in outbreak and emergency **MSF** programmes

Accountabilities

- Carrying out key epidemiological activities in outbreak investigation (description including time, place, people with emphasis on mapping when it is needed) and advising on the operational response
 - Implementing and maintaining a surveillance system to monitor epidemiological trends of relevant outbreak-prone diseases. Guiding activities of medical staff for surveillance and/or active case finding, including ensuring understanding of the need for consistent case definitions and data recording (briefing of all new staff)
 - Monitoring and Implementing initial Assessment (for emergency situation), rapid health assessments and (baseline or follow-up) surveys. Where standard protocols are not available or appropriate, developing a protocol seeking extensive feedback and pilot testing of tools to ensure the objectives will be met robustly with support of HQ epidemiologist
 - Preparing and adapting routine documentation (survey forms, training materials, letters of request/notification, locally appropriate consent forms etc.) with support of HQ epidemiologist. Preparing an appropriate sampling frame and sample selection guidelines with support of HQ epidemiologist
 - Planning and supervising the associated HR processes of the staff under his/her responsibility (recruitment, training/induction, evaluation, potential detection, development and communication) and ensuring that staff exhibits required skills after training and pilot test
 - Managing data systems and ensuring accurate, high quality databases; analyzing results and preparing regular written reports on progress and findings for medical coordinator/HQ and when appropriate to external collaborators/networks (MoH, other NGOs, etc.)
 - Providing training sessions to medical teams on relevant aspects of epidemiology to enhance team response capacity
-

Education

Medical doctor (preferable), nurse or biomedical background with a degree in epidemiology (not in public health)

Experience

- At least few years of tropical medicine experience (having assumed coordination position is a plus)
 - Experience in field epidemiology
-
